Application No. Unassigned

CLAIM AMENDMENTS

1. (Currently Amended) ~~Device~~ A device for fastening a part, ~~such as a trough,~~ to a support part, ~~such as a support plate, particularly on the edge of a recess on said plate,~~ with comprising:

a member ~~that is provided with a~~ including means for being fastened to the part ~~and;~~

a clamp that can be swiveled from a neutral position into a position in which ~~one~~ an end of its ends the clamp engages underneath the support part; and in which the clamp can be fastened by means of a locking screw for fastening the clamp, characterized by the fact that wherein the member ~~(6)~~ can be pre-installed in a captive manner in a receiving profile ~~(4)~~ on ~~the~~ an edge of ~~the~~ a mounting part ~~(2)~~ of the support part.

2. (Currently Amended) ~~Device~~ The device according to Claim 1, ~~characterized by the fact that wherein~~ the receiving profile ~~(4)~~ is provided with includes a protruding rib ~~(40)~~ near ~~the~~ an edge ~~(36)~~ of the mounting part ~~(2)~~ that lies on the support part ~~(3)~~, wherein and the member ~~(6)~~ is pre-installed on ~~said~~ the rib in a captive manner.

3. (Currently Amended) ~~Device~~ The device according to Claim 2, ~~characterized by the fact that including~~ a cam-like projection ~~(8)~~ is arranged on a side surface ~~(7)~~ of the member ~~(6)~~, ~~wherein said the~~ cam fits fitting through ~~the~~ a hole ~~(44)~~ in the profile rib ~~(40)~~ and ~~can be locked on~~ lockable in position at the ~~other side of this~~ hole by turning the member relative to the hole ~~(44)~~, and ~~by the fact that a~~ means ~~(21)~~ is provided for holding the member ~~in this~~ locked in position.

4. (Currently Amended) ~~Device~~ The device according to Claim 3, ~~characterized by the fact that wherein~~ the means for holding the ~~fastening~~ member ~~in its~~ locked in position ~~consists of~~ includes a resetting element ~~(21)~~ that can be elastically deformed during ~~the~~ insertion of the cam ~~(8)~~ into the hole ~~(44)~~, ~~wherein said and~~ the resetting element is arranged located on the member ~~(6)~~ and supported on the mounting part.

5. (Currently Amended) ~~Device~~ The device according to Claim 4, ~~characterized by the fact that wherein the resetting element is realized in the form of~~ includes an elastically deformable tab ~~(21)~~ that protrudes from the member ~~(6)~~.

6. (Currently Amended) ~~Device~~ The device according to ~~one of Claims 3-5~~ Claim 4, ~~characterized by the fact that wherein the receiving profile (4) is realized in the form of~~ has a U-shaped profile, one arm of which is formed by includes the ~~aforementioned rib (40) with the through-hole (44), and by the fact that the member (6) is arranged located in the U-shaped space formed between the arms of the U-shaped profile and supported on the base of the profile by means of the elastic resetting element (21).~~

7. (Currently Amended) ~~Device~~ The device according to Claim 6, ~~characterized by the fact that wherein the support zone consists of a surface of an attached part that laterally protrudes over the upper surface of the member (6).~~

8. (Currently Amended) ~~Device~~ The device according to ~~one of Claims 3-7~~ Claim 4, ~~characterized by the fact that wherein the fastening member contains~~ includes a lateral projection in the form of a strip (9) above spaced from the cam (8), wherein said the strip serves for supporting the fastening member on the a free edge (45) of the rib (40) provided with the through-hole (44) in its with the member locked in position, namely under the effect of by the elastic resetting element (21).

9. (Currently Amended) ~~Device~~ The device according to Claim 1 ~~or 2,~~ ~~characterized by the fact that the~~ wherein a free edge of the protruding rib 40' is realized in has a U-shaped fashion U-shape, and ~~by the fact that the member 6 contains lateral projections 50, 54, between which the U-shaped free edge 48 can be inserted and on which the block member can be locked by turning the block member.~~

10. (Currently Amended) ~~Device~~ The device according to ~~one of Claims 2-9~~ Claim 8, ~~characterized by the fact that wherein the member (6) of the fastening device (1) contains~~ includes a flat region (14), support surface on which one end (1) of the clamp (12) in the form of including a two-armed lever is supported, wherein the other and another end (19) is realized in the form of having a claw that engages underneath the support part.

11. (Currently Amended) ~~Device~~ The device according to Claim 10, ~~characterized by the fact that the~~ wherein a support end ~~(17)~~ of the clamp ~~(12)~~ is ~~realized in the form of a bent end, and by the fact that the support surface (14) of the clamp is arranged slightly above spaced from the support strip (9, 29).~~

12. (Currently Amended) ~~Device~~ The device according to Claim 10 ~~or 11~~, ~~characterized by the fact that~~ wherein the claw ~~(19)~~ is ~~realized in the form of~~ includes an end that laterally and obliquely protrudes from the clamp ~~(12)~~.

13. (Currently Amended) ~~Device~~ The device according to ~~one of Claims 10-12~~ Claim 11, ~~characterized by the fact that~~ including locking depressions ~~(46)~~ are provided in the support surface ~~(14)~~, wherein the support end ~~(17)~~ of the clamp ~~(12)~~ engages with ~~said~~ the depressions ~~in order~~ to fix the clamp in ~~different~~ selectable angular positions.
